esxi_guest.Default: Creation complete after 1m37s [id=75]
2020/09/07 16:33:56 [WARN] Provider "registry.terraform.io/josenk/esxi" produced an unexpected new value for esxi_guest.Default, but we are tolerating it because it is using the legacy plugin SDK.

The following problems may be the cause of any confusing errors from downstream operations:

- .numvcpus: was cty.StringVal("2"), but now cty.StringVal("1")

```
2020-09-07T16:33:56.100Z [DEBUG] plugin: plugin process exited:
path=.terraform/plugins/registry.terraform.io/josenk/esxi/1.7.1/
linux_amd64/terraform-provider-esxi_v1.7.1 pid=2159357
2020-09-07T16:33:56.100Z [DEBUG] plugin: plugin exited
```

Apply complete! Resources: 1 added, 0 changed, 0 destroyed.
